Reply to Attn of

EA2-07-049

TO: NE/Payload Safety Review Panel (PSRP) Executive Secretary

FROM: EA/Alpha Magnetic Spectrometer (AMS) Project Manager

SUBJECT: AMS Phase II FSR Follow-up Technical Interchange Meeting (TIM)

The AMS payload Phase II Flight Safety Review was held in May 2007. There are still four unsigned hazard reports (AMS-02-F01, F03, F04 and F11) that were discussed at that review. The AMS payload would like to request a one day TIM with the PSRP the week of October 8, 2007. Please provide any new or revised comments concerning the subject hazard reports so that we can properly prepare for the TIM. If jointly we are able to resolve issues and get the hazard reports signed prior to this proposed date, then no meeting will be necessary.

Please let me know if this is acceptable. If you have any questions or comments, please contact me at 281-483-3296.

Thanks,

A handwritten signature in black ink, appearing to read "Trent Martin", with a long horizontal flourish extending to the right.

Trent Martin
